

TasorLPS

Logistic Planning and Scheduling

Planning software with controlled traffic allows to enhance the rider experience, reduce operational costs and increase efficiency on a simple, easy to use, web-based platform.

Automating your route planning process not only ensures vehicles are fully utilized, you can also schedule your trip in real time. You will have maximized vehicle utilization and driver productivity and also eliminate the need for additional trip. With our transport software SmartTransNet, you always have an overview of your transport orders. From the order overview to efficient route planning, our system offers you everything you need to digitize your business.

The result is a transport plan that creates the most efficient routes for every driver, every day. Our flexible configuration settings enable you to priorities your own fleet for work allocation, ensuring you are making the best use of your own vehicles.

In addition to the above the cost reductions, transportation optimization software will also reduce transport planning time. In fact, planning time is reduced from hours to minutes.

Harnessing smart technology maximize your resources and to turn own challenges into opportunities.

The ability to plan better

Intelligently routing and scheduling means that routes can be structured more efficiently, with lower total mileage, better vehicle fill and improved drivers.

Managing available resources

Resource management optimization is not a simple practice. As a business expand, the combination of vehicles and drivers may become more complicated.

Driver Navigation

Real-time route optimization

Real-time information

Software provides the ability to view where drivers and shipments are located in real-time. This impart information as to the duration of time a route takes and this can then create an efficient route schedule.

TasorLPS that gives you control and management offering you an optimum follow up of your transportation activity. The solution is ideal for vehicle scheduling and optimization which can help you to save time and money. Complete automation allows your transport business to run as lightly as possible, maximizing revenue.

Features

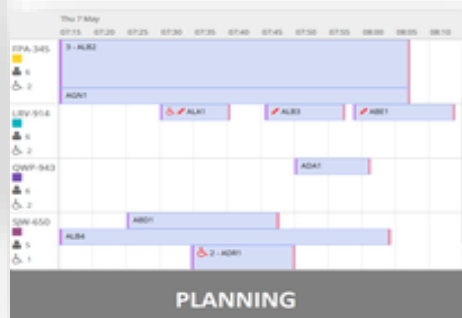

- Web based
- Order priority
- Customer priority at order level
- Interactive visualization
- Tactical and Strategic planning
- “what-if” Analysis/Scenarios
- Resource unavailability
- Capable-to-promise
- Finite scheduling
- Plan continuation
- Gantt chart

TasorLPS PROCESS STRUCTURE

Transport	Pick up time	Drop off time	Pick up stop code	Drop off stop code
